

HAND TOOLS RANGE

Best Solution for Professional & Industrial users

Makita manufactures best-in-class industrial power tools for the professional user. With more than 100 years of experience in advanced motor design, Makita applies the latest innovation to engineer and manufacture the best power tools in the world. Makita Power Tools have more power and less weight, and are more compact and more efficient than any other.

Makita offers more solutions for the professional and industrial users and now offers a wide range of quality hand tools including wrenches, ratchets, sockets, pliers, screwdrivers, knife, measuring tape and many more.

Makita hands tools afford greater access in tight spaces and specifically designed to meet the diverse needs of all users.

We have categorized the hand tools in different sections from Wrenches to flashlight. Now you can choose your correct hand tools easily and quickly.

SHOCK DRIVER

Makita shock driver is very useful tool which is able to be used as a regular hand driver and a shock driver when you work on the stripped screw.

This handy driver can remove the crushed or stripped screws which could not be loosened by electric tools. Applying the impact onto the handle generates a torque in the rotation direction, so the stripped screws can be removed.

HOW TO REMOVE

While applying force in the fastening direction, hold the grip securely.

Apply strong impact with the hammer.

The impact onto the handle generates the 12 degrees torque in the loosening direction and it loosens even the stripped screw.

DIFFERENCE BETWEEN NORMAL DRIVER AND NEW SHOCK DRIVER

Item	Screw removal 	Stripped / Crushed screw removal 
MAKITA SHOCK DRIVER 	✓	✓
NORMAL SCREWDRIVER 	✓	✗

Please note: Our shock driver is intended for machine screws only. It is not suitable for screws into soft member such as wood screw or topping screw. Even after applying impact, the soft member might absorb the impact, or member itself might break. Also, it cannot be used for even machine screws that attach soft member such as aluminum, copper or thin board.

SIZE	LENGTH	PART NO

MEASURING

Makita measurement tape is highly durable and convenient to use. Normally when the scales are blurred or hook is lost, that would be the end of tape's life. This measuring tape is designed for professionals which has specially coated tape and hook protector's damper for absorbing shocks. This helps increasing durability of the measuring tape.

1. Special Coating

- "DURA COAT" for 5 times more durability
- "SILICA COAT" to make a note easily by a pencil

2. High durability of Hook

- Installed damper to absorb the shock on the hook
- Hook protector to reduce the shock on the hook
- Tightly fixed hook with "4rivets+protector"

3. Convenience

- 2-sided printing
- Hook with magnet
- Matte finish on tape reduces glare, making it easy to read in bright environments
