Excellent balance and lightweight design

Optimum blade shape for smooth cutting

New triple-edged cutting teeth are designed to easily catch and firmly hold branches. Curved blades reduce friction resistance to suppress energy loss. Run time is increased due to the low resistance.

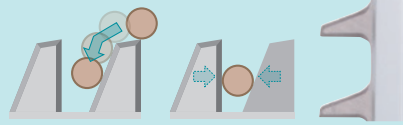

Sharp edge blades:

Upper blade...curving downward
Lower blade...curving upward

Contact point is only both tips.

Twigs are caught easily and held firmly

Safety Features

Two-handed start-up for user protection

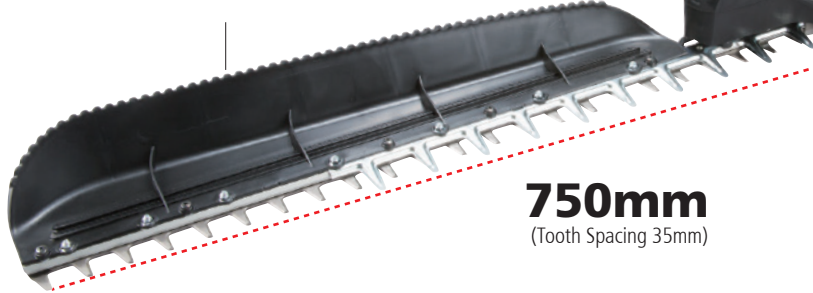

Automatic off function if it is not operated for 60 seconds after being turned on

Electric brake for increased productivity and operator safety

Rotatable handle, which allows comfort when operating in all positions

Soft grip provides increased comfort on the job

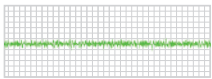

Chip receiver collect the leaves while cutting

750mm
(Tooth Spacing 35mm)

3-speed design for optimum speed control
(High: 4,400, Medium: 3,600, Low: 2,000 SPM)

Anti-vibration structure for comfortable operation

Anti-vibration structure

Reverse rotation system frees the blade when it is jammed by thick branches

eXtreme protection technology XPT protect tools from dust and water

Constant speed control

Maintains constant speed under load

Soft start feature For smooth start-ups
