High durability with BL motor

- Large ball bearing supports the motor
- New switch design to reduce contact weariness

Spiral bevel gears for smoother rotations and a more efficient transfer of energy.

Reinforced metal gear housing engineered for maximum job site durability

Active Feedback sensing Technology

Shuts down the tool, if the rotation speed suddenly slows down

Extreme Protection Technology *XPT*

is engineered for improved dust and water resistance

New tool-less wheel cover

Allows for fast and easy angle adjustment and installation / removal of wheel cover

Electronic current limiter

helps protect the motor from overload in high torque application

Electric brake

stops the grinding or cut-off wheel in 2 seconds or less for maximum productivity

Anti-restart protection

engineered to prevent motor start up when battery is inserted with switch locked on

Soft start

suppresses start-up reaction for smooth start-ups and longer gear life
