Thatching

Removing deposited lawn clippings, generated moss, etc with thatching blade

Aeration

Able to perform both thatching and vertical cutting to cut through runners and roots with high durable verticle cutter

High Durable Verticle Cutter

- Blunt angled blade tip slows blade wear to minimize the reduction in working depth.
- The slow wear reduces blade change frequency and running cost.

Low Vibration

The blades of Vertical cutter are arranged symmetrically about the left-right center line of the rotary blade shaft to provide balanced rotation for reduced vibration

Toolless foldable handle

Handle can be folded in two steps for compact storage

Stable operation

Battery and motor weight in front of blade assembly allowing for reliable power transmission to the blade to provide consistent cutting depth

Center of Gravity

Easy blade change

Easy two bolt removal to shift the blade

XPT (eXtreme Protection Technology) / IPX4-compatible

Water Resistance Cutting Deck
