Robotic Mower LXT
RM350D

Product Description

18V LXT • 24cm • 3,500sqm

Robotic Mower designed to mow the lawn and recharge automatically and achieve a high operation rate of 3,500sqm due to fast charging

The main features and benefits are:
• Specifying work area with guide wires
• Random running
• Maintenance software-supported
• Control panel with various settings
• IPX4
• Anti-theft function

Product Features

◉ 18V Li-Ion BL 24 cm (9-1/2") Robotic Mower

◉ Washable with water

◉ If the lawn is high, user can let the mower automatically mow the lawn down to a desired height gradually in stages over several days by setting the starting height and desired height in the mower

◉ Setting range of cutting height is 20 - 60mm, 5 mm increments (9 stages)

◉ Automatic mowing and charging reduces the labor required for lawn maintenance

◉ A boundary wire and up to two guide wires control traveling of the robotic mower

◉ Mowing start position setting - Up to 5 start positions for mowing can be set

◉ Mowing can be scheduled at the user's convenience by setting the days of the week and time to mow the lawn

Barcode

197050002600

Product Specifications

Max Work Area	3,500 m²
Continuous Use	135 min
Cutting Width	240 mm
No Load Speed	2,300 per min
Cutting Height Adjustment	Stage: 9 (Adjustment Range: 20 - 60 mm)
Max Climbing Angle	26
Dimensions (L x W x H)	700 x 560 x 270 mm
Net Weight	13.7 kg

Standard Equipment

◉ Charging Station

◉ AC Adaptor

◉ Power Supply Cord

◉ Station Peg

◉ Peg

◉ Wire

◉ Terminal

◉ Terminal Block

◉ Swing Back Blade

◉ Screw

◉ Hex Wrench
